C.M. SPRAY S.r.l. founded in 1988, it operates in the painting sector with the supply of systems, plants and machines for spraying liquid and powder paints. The company, with operational headquarters in Carbonera (TV), has always worked to offer its customers and the market effective and reliable solutions in surface coating. Thanks to the experience acquired, CM SPRAY S.r.l. offers a consultancy, assistance and sales service that accompanies any customer in the design, development and management of their own painting department. Furthermore, thanks to the new innovative equipment that is continuously added to the vast range of products already distributed, customers are offered the possibility of adapting their spraying systems to the new products developed by research. C.M. SPRAY S.r.l. addresses the market of the future, aware of being able to give all its customers the technical answers that companies that want to progress in the quality and cost reduction of their products and processes need. In recent years C.M. SPRAY S.r.l. has made quality and experience its business card.

IBK pumps differ from others for the quality in every small part. Absolutely no compromises are allowed in design and production. The flexibility of piston pumps is also an advantage. You can combine almost every hydraulic section with every motor and get the perfect solution for your production - you certainly can do this at any time. Your pump will increase with your activity. Pure pressure, produced in Germany from high quality stainless steel with robust construction and minimal service requirements, modular and configurable with maximum variability.
